Finding Your Path to Resiliency:

The Effects of Vicarious Trauma in Adult Protective Services

Presenter:

Trudy Gregorie, President
National Committee for the Prevention of Elder Abuse (NCPEA)

Senior Director
Justice Solutions
Washington, D.C.
tgregorie@justicesolutions.org

2015 NAPSA Conference
Orlando, FL
September 29, 2015
Working in systems that respond to elder abuse can be stressful. In adult protective services, frustrations and stress abound and professionals often must set their own limits. Working closely with traumatized older adults can also have an emotional and psychological impact for an APS professional due to the second-hand exposure to trauma, multiplied case after case, client after client. Vicarious trauma is an occupational hazard for those who serve, treat or represent victims of elder abuse and may affect an individual professional in profound ways. This presentation defines the experience of secondary trauma and its implications for those professionals who work within adult protective services.

**Definitions**

- **Stress:** Physiological reaction or response to a stimulus.
- **Burnout:** Severe reaction to stress in the work environment which results in physical and emotional depletion.
- **Vicarious trauma:** Passing on of traumatic stress by observation and/or bearing witness to stories of traumatic events.
- **Compassion fatigue:** Physical and emotional depletion caused by the accumulated memory of victims’ stories and experiences or from one’s own trauma on the job.

**Job Factors That Can Cause Stress and Burnout:**

<table>
<thead>
<tr>
<th>Work overload</th>
<th>Frequent priority changes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lack of control</td>
<td>Inadequate funding/resources</td>
</tr>
<tr>
<td>Frequent work interruptions</td>
<td>Unclear job expectations</td>
</tr>
<tr>
<td>Lack of appreciation</td>
<td>Limited upward mobility</td>
</tr>
<tr>
<td>Paperwork</td>
<td>Poor leadership</td>
</tr>
</tbody>
</table>
## Physical Symptoms of Prolonged Stress

<table>
<thead>
<tr>
<th>MILD FORM</th>
<th>EXTREME FORM</th>
</tr>
</thead>
<tbody>
<tr>
<td>• headaches</td>
<td>• migraines</td>
</tr>
<tr>
<td>• heartburn</td>
<td>• gastric ulcers</td>
</tr>
<tr>
<td>• gastrointestinal problems</td>
<td>• colitis</td>
</tr>
<tr>
<td>• skin rash/hives</td>
<td>• eczema</td>
</tr>
<tr>
<td>• lower immunity</td>
<td>• heart attack</td>
</tr>
<tr>
<td>• high blood pressure</td>
<td>• stroke</td>
</tr>
</tbody>
</table>

## Burnout Warning Signs:

- Depression
- Feelings of inadequacy or incompetence; self-critical
- Cynicism & pessimism
- Loss of compassion
- Discouragement
- Chronic fatigue
- Irritability & inflexibility

## Contributing Factors:

- Professional isolation
- Constant demand to be empathetic
- Ambiguous successes
- Failure to live up to one’s expectations
BURNOUT SELF - ASSESSMENT  (Dr. Gail Nagle, Greenville SC)

Choose: 4 if you strongly agree; 3 if you agree; 2 if you mildly disagree; and 1 if you strongly disagree. Put the number on the blank in front of the question. When finished, add the numbers for a total score.

___ 1. Do you find yourself frequently upset or irritable?
___ 2. Are you performing your job carelessly or mechanically?
___ 3. Do activities you once enjoyed no longer interest you?
___ 4. Are you withdrawing from key relationships in your life?
___ 5. Are you less communicative with close friends or loved ones?
___ 6. Have you over-extended or over-committed yourself in terms of time or energy?
___ 7. Are you tired of it all, feeling mentally or physically drained?
___ 8. Do you find there is no time for relaxation or recreation?
___ 9. Have you lost your sense of perspective/view minor setbacks as catastrophes?
___ 10. Are you suffering more physical complaints: headaches, insomnia, frequent colds, fatigue?
___ 11. Do you have a hostile or cynical attitude toward others?
___ 12. Do you have unrealistic standards of behavior or performance for yourself?
___ 13. Is your general feeling one of sadness or depression?
___ 14. Are you working harder but accomplishing less?
___ 15. Do you dread going to work in the morning?
___ 16. Do you try to do everything equally well?
___ 17. Is your day filled with constant frustration and dissatisfaction?
___ 18. Do you feel you are inadequately compensated for the work you do?
___ 19. Are you unable to laugh at yourself?
___ 20. Do you feel more forgetful than usual? (Example: appointments.)

______ TOTAL

Burnout Self – Test Scoring
20-40: No indication of burnout potential (but if less than 30, not being challenged).
41-50: Have good balance.
51-60: Got some warning signs.
61-70: Mild burnout; probably developing physical symptoms.
71-80: BURNOUT !!!
History of Vicarious Trauma

- 1990 — First defined among counselors of incest survivors.
- Later applied to counselors’ reactions in work with all sexual abuse victims.
- Then applied to counselors working with all violent crime.
- Now applied to all who work with traumatized persons.

Basic Elements

- Not traumatized directly.
- Suffer gradual increase of exposure.
- Second-hand exposure (multiplied crime after crime, client after client) can traumatize caregivers.
- Parallels experience of PTSD.
- Can reduce effectiveness & shorten tenure.

Vicarious Trauma & Compassion Fatigue

- “The cost of caring.”
- Characterized by losing your sense of self to the people you serve.
- Emotional residue of exposure to working with the suffering.
- Must contend not only with normal work stress, but with the emotional and personal feelings for the suffering.
- State of tension and preoccupation with the individual or cumulative trauma of clients.
- You are absorbing the trauma through the eyes and ears of your clients.

Combination of Factors:

- Nature of work
- Nature of clientele
- Cumulative exposure to clients’ trauma
- Organizational context of work
- Social & cultural context of work

Why the Work Impacts Us

- We function outside the range of “normal” in our work.
- Exposure to cruelty and graphic info
- Exposure to the impact of crime on victims and communities
- Ongoing awareness of the possibility of crime and victimization
- Isolation

Personal Contributing Factors

- Unrealistic professional expectations
- Personal history of trauma that may be reawakened by client trauma
- Unfounded belief about the value of stoicism at work
- Current stressful personal life
Ways Supervisors Can Help Workers Deal with Secondary Trauma

To avoid burnout and to help caseworkers deal effectively with the effects of secondary trauma, supervisors can:

- Assist caseworkers in dealing with the emotional impact of the work by allowing them to share their thoughts and feelings about it.

- Offer ongoing or further support and validation to line workers when a traumatic event occurs. Staff need to be able to express their feelings and have opportunities to talk about their thoughts. If intrusive thoughts extend beyond the trauma experience, caseworkers need to learn to anticipate and manage them effectively.

- Institute a trauma support group. Meetings should be regularly scheduled (e.g., at the same time twice a month) with the focus on the traumatic stress in caseworkers' lives.

- Initiate supportive activities on the unit level. For example, a practice could be started of coworkers helping with paperwork or assisting with home visits during particularly traumatic periods. Supervisors can establish flexible work schedules, including "mental health days" or days spent in the office not making home visits. Another option is to spend time in certain meetings discussing the personal side of work.

- Deliver training to create self-awareness regarding stress and how to manage it, how to understand the effects of trauma, and how to develop coping skills that enable staff to better manage trauma.

### Resilience Strategies

*Resilience has been defined as "the capacity to bounce back: to withstand hardship and repair oneself."*

<table>
<thead>
<tr>
<th>For Self-Knowledge and Insight:</th>
<th>For Strong Relationships:</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ Explore your motivations for working with victims of crime</td>
<td>▪ Enhance communication skills</td>
</tr>
<tr>
<td>▪ Identify your own strengths and challenges</td>
<td>▪ Learn boundaries of confidentiality</td>
</tr>
<tr>
<td>▪ Identify themes associated with discomfort</td>
<td>▪ Collaborate</td>
</tr>
<tr>
<td>▪ Clarify goals, mission, and boundaries of the organization</td>
<td>▪ Discuss cases</td>
</tr>
<tr>
<td>▪ Know your code of ethics</td>
<td>▪ Seek inclusiveness and diversity</td>
</tr>
</tbody>
</table>

### For Sense of Hope:

| ▪ Develop opportunities to succeed | ▪ Foster a team approach |
| ▪ Practice gratitude | ▪ Address conflict-resolution proactively |
| ▪ Change or expand your job description | ▪ Strive to be genuine, empathetic, and warm |
| ▪ Give praise | |
| ▪ Diversify client types | |
| ▪ Seek advanced professional development | |
| ▪ Decorate your office | |
| ▪ Find appropriate ways to have fun | |

### For Healthy Coping:

| ▪ Learn to identify your physical stress reactions | ▪ Assess your personal values |
| ▪ Balance your life | ▪ Integrate new understanding in your work |
| ▪ Get adequate sleep | ▪ Assess your perspective of suffering |
| ▪ Change the pace | ▪ Question old beliefs |
| ▪ Develop calming and modulation techniques | ▪ Foster altruism |
| ▪ Assess safety in your work environment | ▪ Engage in social activism |
| | ▪ Include meaning and values in assessment of victims’ strengths |
| | ▪ Discard activities that are not coherent with values |

### For Strong Relationships:

| ▪ Enhance communication skills | | |
| ▪ Learn boundaries of confidentiality | | |
| ▪ Collaborate | | |
| ▪ Discuss cases | | |
| ▪ Seek inclusiveness and diversity | | |
| ▪ Foster a team approach | | |
| ▪ Address conflict-resolution proactively | | |
| ▪ Strive to be genuine, empathetic, and warm | | |
The ABCs of Managing Secondary Trauma—
Awareness, Balance, and Connection

Being aware of how our work can impact us, and achieving and maintaining a sense of balance and connection in our lives, can prevent us from experiencing secondary trauma and/or mitigate its harmful effects. Listed below are several ways in which you can decrease your risk of experiencing—or reduce the impact of—secondary trauma.

**Awareness**
- *Know your own “trauma map.”* Acknowledge your own history of trauma and be aware that it can affect how you view and do this work.
- *Inventory your current lifestyle choices and make necessary changes.* Do you get enough sleep? Do you allow yourself downtime? Do you exercise regularly? Try to do these things.
- *Take care of yourself.* Create a self-care list and post it prominently in your home or office. A sample self-care list may encourage you to:
  - Be creative;
  - Get away;
  - Get outside and appreciate the weather;
  - Enjoy other environments;
  - Have fun; and
  - Socialize with people who aren’t criminal!

**Balance**
- *Give yourself permission to fully experience emotional reactions.* Do not keep your emotions “bottled up.”
- *Maintain clear work boundaries.* Avoid working overtime and do not spend all of your free time socializing only with coworkers, discussing the negative aspects of your job.
- *Set realistic goals for yourself.* Know your limits and accept them.
- *Learn and practice time management skills.* These skills will help you achieve a sense of balance in both your professional and personal lives.
- *Seek out a new leisure activity.* Choose a leisure activity unrelated to your job.
- *Recognize negative coping skills and avoid them.* Substitute these coping skills with the more positive coping skills included in your self-care list!

**Connection**
- *Listen to feedback from colleagues, friends, and family members.* Have a family member or friend conduct periodic “pulse checks.”
- *Avoid professional isolation.* While it is best to not spend all of your time with coworkers, it is beneficial to be connected with and supported by your coworkers on the job.
- *Debrief after difficult cases.* Now is the time to talk to and connect with another coworker!
- *Develop support systems.* Start an informal peer support group, seek out a mentor, or be a mentor to someone else.
- *Seek training to improve job skills and capacity.* Training will not only allow you to stay abreast of new issues emerging in the field but will also allow you to connect with others who do this work.
- *Remember your spiritual side.* While often neglected when stress occurs, this aspect can be most helpful to coping with secondary trauma.
Next Steps in Responding to Secondary Trauma

Being aware of what you need in order to take care of yourself in this work is an important step in responding to secondary trauma. Take a moment to reflect on your specific needs and complete the handout below.

1. Write down three things you could do to address secondary trauma for each of the following areas of your life and work: personal, professional, and agency.

   **Personal:**
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

   **Professional:**
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

   **Agency:**
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

2. Place an asterisk (*) beside every strategy you could implement during the next month.

3. Circle one in each category that you will try to do during the next week.

4. Identify three personal satisfactions you derive from doing this work.
